Backend Developer Intern

I am currently a second-year student majoring in Management Information Systems. I am looking for an internship in backend to gain more experience. In life, i am a dynamic, hard-working person who always wants to learn from others to improve my abilities, as well as to accumulate more experience in the IT industry

SKILLS

Technical skills: NodeJS, ExpressJS, ReactJS, MySQL, HTML, CSS, JavaScript

English: Basic

EDUCATION

in Management Information Systems

University of Finance Marketing

10/2022 – Present

PROJECTS

Book manager

10/2023 – 11/2023

Using Express JS, handlebars, mongoDB,... to build the CRUD app to manage books

After completing this project, I can understand the basic way a website operates. Additionally, I can learn how to add, delete, and edit (content) further.

To do list application

11/2023 – 12/2023

Using React JS, axios,... I developed an application to manage time-related tasks. This application facilitated the different creation, viewing, modification and delete of time-related data.

After this project, I have a deeper understanding of how a frontend framework works. Additionally, it also helps me create a web application that does not require page reloading.

No poverty backend

01/2024 – 02/2024

Utilizing Node JS, Express JS, MySQL, Resful API,... I developed a fully-fledged CRUD API for the No poverty project, enabling comprehensive management of data related to the project's mission.

After this project, i have learned how to design a database, write APIs according to the Restful standard. Additionally, I have learned how to use some libraries like sequelize, bootstrap 4,...
